Heather Davis

Software Developer

SUMMARY

Creative, detail-oriented, and hardworking Software Developer with a proven track record of creating and implementing successful front end web applications. I am a self-starter motivated by success and ready to expand my knowledge and grow my skillset as part of a team.

WORK EXPERIENCE

Barista – Starbucks

June 2019 — September 2020

- Collaborated with a team of baristas to make and serve handcrafted coffees of all sorts.

- Memorized and implemented many recipes.

- Maintained a clean and orderly working environment.

- Connected with every customer in an effort to make their experience the best it could be.

Recent Projects:

Web Development Portfolio Website – A front-end website showcasing my work as a developer. The page has a fun, creative feel to it with a sleek layout. The user is able to download my resume with the push of a button and navigate the page via jumping links and a fun custom scrollbar.

Splitter – A personal project which gives the user the ability to split a check evenly between multiple parties, including a tip which is calculated by a percentage given by the user. The display then shows how much each person should be charged for the meal.

Current Projects:

Partner Media Player, ILF – A freelance project for Interactive Life Forms, LLC which

displays a media slider full of tiles displaying images related to each partnered streaming site. On click the main display plays a quick trailer from the target partner, complete with links to the official site and the respective logos.
